Steve LaNore : Weather Wits and Science Snickers: Corny Jokes and Cool Facts! (Volume 1) before purchasing it in order to gage whether or not it would be worth my time, and all praised Weather Wits and Science Snickers: Corny Jokes and Cool Facts! (Volume 1):

0 of 0 people found the following review helpful. Fun book for a variety of ages By Rachel Horon This book is so much fun and appeals to a variety of ages and reading interests. My 7-year old loved the jokes and illustrations while my 13-year old was interested in the weather and science facts. I even learned something about raindrops. There are illustrations, photographs, and charts to reinforce the concept in each section. If your child is young, this is a great book that will grow with them. 0 of 0 people found the following review helpful. The author makes science and weather fun topics - this is a must have in your home library By Beverly Clark I bought this book for my

granddaughter. She is seven and I am always looking for quality books that inspire her to read more. As a retired teacher, I really wish this book would have been available when I was teaching. It is the perfect book to encourage children to read and learn while making the process fun. Science and weather are sometimes daunting topics to children and adults. The author created an organized read filled with a lot of quality images. It is definitely a step above many of the other books that I have chosen for my granddaughter. I definitely recommend this book and I suggest you go one step more and buy a second copy. This book would be a welcome addition in any classroom library and your child's teacher will be pleased to have it on their classroom bookshelf. 0 of 0 people found the following review helpful. A must have for wondering minds. By C-Five Weather Wits and Science Snickers by Steve LaNore, is a great book for both kids and adults. It helps the readers understand how the weather works, debunk some of the myths that surround science in a way that a child could understand and it's funny to boot. My eight year old and my 7-year old nephew kept asking questions, and enjoyed the pictures and jokes too. LaNore found a way to keep my children minds actively thinking about the book I was reading, instead of fidgeting and running off. He understood the audience he was targeting and uses the right mix of humor, comics, and neat pictures. Weather Wits and Science Snickers is a must read for all little wondering minds. I would say ages 7 on up would do well with this book.

Winner, NFPW Communications Contest / 1st place children's nonfiction (2013)**Mom's Choice Award for children's nonfiction (2013)*****Winner, Press Women of Texas Communications Contest / 1st place children's nonfiction (2012)*****TERRIFIC Stocking stuffer for ages 8 and up!!!**See how fun and science blend together into an easy and informative read for ages 8 and up. "Weather Wits Science Snickers" offers weather and science jokes accompanied by full-color comic-book style illustrations followed by an understandable description of the science within each joke. The reader will enjoy some "cool" real-world images included in each section, and Web links provide plenty of opportunity for further exploration of each topic. Subjects covered range from tornadoes to cold fronts, and even vacuum cleaners on the moon! This is a large (8-1/2" x 11") high-quality color paperback book; 64 pages. "Weather Wits Science Snickers" is authored by a 9-time award winning broadcast meteorologist with 29 years in the field.

"... kids love corny jokes. Combining a joke with each amazing scientific fact is very clever. I use the term "amazing" seriously." Cynthia Parker Young, Press Women of Texas contest judge From the Midwest Book : "Weather Wits Science Snickers" is a multi- award-winning, extremely entertaining collection of funny weather observations and sayings that answer kids' curious weather questions. Ideally presented for kids age 9 and up, "Weather Wits Science Snickers" is juvenile educational humor at its best.....packs a heap of fascinating factual data into a very appealing format. Using cartoon illustrations, jokes, stunning color photographs, and question and answer text, author Steve LaNore covers the exciting basic questions about weather, earth, and nature. ... "From the Author" "Weather Wits" uses corny jokes and cool science facts together so that the reader will laugh and learn at the same time. Teachers and parents alike have shared success stories of the giggles kids got while reading it, and also their high retention of the material. Adults who enjoy silly humor will also find it a fun read! About the Author Steve LaNore holds a Bachelor of Science degree in Meteorology from Texas AM University. He is a 9-time award-winning broadcaster with nearly three decades of television experience. LaNore is an AMS Certified Broadcast Meteorologist and has completed the National Weather service advanced Skywarn training program. Steve says, "I love to watch kids learn. Over the years I have observed that humor makes a great gateway for science learning". He lives in a small community north of Dallas with his wife Gera. He is a self-described weather "nerd", but his interests cover a wide range from writing, music, art, history and philosophy, to all things science...and even a good game of poker now and then.
