An awesome guide to recognize the Egyptian society nowadaysBy Doaa RushdanAs an extension to the awesome book "Whatever Happened to the Egyptians?", this book is the second episode of manifesting the changes that happened in the Egyptian society following the revolution in 1952 and up to the age of globalization.In this book, as well as the other previous one "Whatever Happened to the Egyptians?", and by means of the very logical premise along with the well-structured dissertation and the interesting exhibition, the author walks you through the social and economical changes that happened in Egypt, explaining the reasons why these changes occurred, and eventually resulted in the puzzling drastic changes in moralities that keeps all the Egyptians exclaiming "Whatever happened to the Egyptians?"0 of 0 people found the following review helpful. At the time of the Egyptian Revolution in 1952, the population of Egypt was around 22 million. At the end of 2002, it stood at 69 million, and was growing at a rate of 1.33 million a year. What happens to a society that grows so quickly, when the habitable and cultivable land of the country is strictly limited? After the success of *Whatever Happened to the Egyptians?*, Galal Amin now takes a further bemused look at the changes that have taken place in Egyptian society over the past half century, this time considering the disruptions brought about by the surge in population. Basing his arguments on both academic research and his own personal experiences and impressions, and employing the same light humor and keen sense of empathy as in his earlier work, the author discusses how runaway population growth has not only profound effects on many aspects of society from love and fashion to telephones, the supermarket, and religion but also predictable effects on the economy.
