Mackenzie Crowne : Where Would You Like Your Nipple?: Navigating the Breast Cancer Abyss with Humor and Hope (Volume 1) before purchasing it in order to gage whether or not it would be worth my time, and all praised Where Would You Like Your Nipple?: Navigating the Breast Cancer Abyss with Humor and Hope (Volume 1):

1 of 1 people found the following review helpful. Grace in Times of StruggleBy JT TherrienI enjoyed reading Mac's

book about her personal struggle with breast cancer. Each page described an honest, dramatic, funny/sad and inspirational account of her journey from diagnosis to treatment to cure. Written as a guide for women going through such a nightmare, Mac's inclusion of the universal themes of struggle for health, support of friendship, and fear of dying means that men can also relate to her manual for survival. I was often deeply moved by her inclusion of what her friends, family and husband were going through as she underwent her treatments. For that insight, I thank her. And I praise the grace of Mac's evident faith - for showing us that God was a constant and necessary member of her support team. Well, done, Mac. 1 of 1 people found the following review helpful. A Truly Inspiring Story! By Grace MyBookSnack Breast cancer. Whether it be a mother, a daughter, a sister, a co-worker, a neighbor, a friend of a friend, in some way, shape, or form breast cancer has unfortunately touched our lives. It is an alarming moment to get that phone call. When my mother was told of her diagnosis of breast cancer years ago, it was devastating for her, as well as, for everyone in the family. Reading Mackenzie Crowne's story of survival brought back so many memories. All of the gamut of emotions she went through from diagnosis to surgeries to treatments, I saw my mother go through as well. Everyone deals with cancer in their own way. This story gives insight to how Ms. Crowne dealt with it in her life. It is honest and raw and deeply poignant. In the midst of the overwhelming and trying times, there is laughter, too. I loved that she was able to find humor during this time. The title alone makes me smile big! I knew exactly what she was talking about having laughed with my mother when she got to that part of the reconstruction process. Thank you, Mackenzie Crowne, for sharing your story. I have no doubt that your inspiring story will help many people, their family, and friends. The cover is absolutely beautiful, too! 1 of 1 people found the following review helpful. I'm cheering for Mackenzie! By Chrys Fey Where Would You Like Your Nipple? is incredibly honest, which is what we need! Mackenzie Crowne's voice leaps off the pages. Her writing is real, funny, fresh and entertaining. After reading her story, I feel like I know her. I wish I could give her a hug! She is a strong, brave woman offering insight, humor, truth and hope to women going through a breast cancer diagnosis. But everyone can benefit from reading this, whether they have cancer or not! I've had my own (different) set of health problems and this touched me so deeply. Thank you, Mackenzie, for sharing your story for all to read!

Cancer. Though it's not a four-letter word, it sure conjures up a lot of them. I won't say the first word that popped into my mind, and out of my mouth, when I received the diagnosis of stage III breast cancer — it's a bad word, my mother would be horrified. I can tell you it wasn't Whoopee! Many other four-letter words quickly joined that first, shocked sentiment. Fear, sick, pain, loss, hell, dead... You get the drift. If you've received a similar diagnosis, or know someone who has, I don't want to scare you. You're scared enough already, and have probably experienced many of those words yourself, but, though your fears are justified, I can share one four-letter word that trumps all others. Hope. I am a survivor. You can be too. Victory is ours!

About the Author Mac is a wife, mother, and really young, grandmother. She and her husband were blessed with two rambunctious little boys who they managed to raise into wonderful men without any disfiguring mishaps. Dirt bikes and ESPN are the order around their home, and life at the "Testosterone Ranch" more closely resembles one of today's wacky reality shows, than yesterday's "Leave It To Beaver". Mac is one of eight kids, raised just north of Boston. Her childhood was a free-for-all with hordes of family and friends. She moved to Phoenix as an adult because living in the southwest feeds her soul. Mac's love of books, specifically the romance genre, has been a lifelong affair, both as a reader and a writer. A bout with breast cancer sharpened her resolve to see her stories shared with others. As of today, she is a multi-published romance author and a five-year survivor.
