Jason Solomons : Woody Allen Film by Film before purchasing it in order to gage whether or not it would be worth my time, and all praised Woody Allen Film by Film:

Featuring an interview with Oscar-winning director Woody Allen himself, and text by film critic Jason Solomons, Woody Allen Film by Film is the most complete illustrated analysis of Allens work to date. Woody Allen celebrated 50 years of filmmaking in 2015 and has averaged one film per year throughout his entire career. This book not only covers every movie by decade, from Whats New Pussycat to Irrational Man, but also looks at Woody the actor and the writer; provides an overview of his films themes, styles and motifs; and examines the cultural impact of a director whose works remain a force to be reckoned with.
